NEVADA MEDICAIDBUSINESS PROCESS OUTLINE**MENTAL HEALTH REHABILITATION (REHAB OPTION) SERVICES****General Description of Process**

By way of Interagency Agreements Nevada Medicaid processes claims for Mental Health Rehabilitation Services provided to Medicaid-eligible clients by or through the Division of Child and Family Services (DCFS) and the Division of Mental Health and Development Services (MH/DS).

Typically, Medicaid makes two types of payments for clients in receipt of mental health/rehabilitation services. One payment is to either DCFS or MH/DS to case manage the client; the other payment is to the rehab option provider (i.e. group home, therapeutic foster home which is actually providing the service). For more information pertaining to the mental health rehabilitation (option) services payment methodology, please consult the Business Process Re-Engineering (BPR) section entitled "HCFA-64."

Mental Health Rehabilitation Services refers to those services, which are provided with the primary purpose of treatment or rehabilitation of a mental disorder. Individuals must have a functional impairment in major life activities, including, but not limited to, substantial limitations in basic living skills, occupational-education adjustment, self-care, social/interpersonal skills or communication skills. All services are reimbursable only when provided as a referral from a licensed physician or other licensed practitioner of the healing arts. Services must be provided in accordance with a written plan of care, which has been approved by the primary case manager.

DCFS

Services provided by DCFS to Medicaid-eligible children and adolescents under 18 are:

1. Intensive Community-Based Treatment
2. Rehabilitative Partial (Day) Care
3. Therapeutic Foster Care
4. Residential Treatment (Levels I through V)
5. Rehabilitative Skills Training
6. Rehabilitative Therapy

MH/DS

Services provided by MH/DS to Medicaid-eligible adults 18 years of age and older are:

1. Independent Living Training
2. Psychosocial Rehabilitation
